THE ANNALS OF APPLIED BIOLOGY

EDITED BY
W. B. BRIERLEY
AND
C. T. GIMINGHAM

VOLUME 28

CAMBRIDGE
AT THE UNIVERSITY PRESS
1941

PRINTED IN GREAT BRITAIN

CONTENTS

No. 1 (February 1941)

PAGE

1. The nutrition of turnips. By R. M. Woodman. (With Plate 1) . . . 1

2. The Ulster method for the examination of flax seed for the presence of seed-borne parasites. By A. E. Muskett and J. P. Malone. (With Plate 2) . . 8

3. Soil conditions and the take-all disease of wheat. VI. The effect of plant nutrition upon disease resistance. By S. D. Garrett 14

4. Effect of addition of sugar on rate of decay of wood. By W. P. K. Findlay . 19

5. Sampling for leatherjackets with orthodichlorobenzene emulsion. By H. F. Barnes, M.A., Ph.D. (With 2 Text-figures) 23

6. Some observations on the life history of the angleshades moth (*Brotolomia meticulosa* L.). By W. J. Parr and E. R. Speyer, M.A. (With Plate 3) . . 29

7. The fever fly (*Dilophus febrilis* L.) and methods for control of its larvae in cultivated lawns. By E. E. Edwards, M.Sc. 34

8. Observations on the life history of *Anguillulina pratensis*. By C. H. Gadd and C. A. Loos. (With 4 Text-figures) 39

9. Selectivity in bacterial food by soil amoebae in pure mixed culture and in sterilized soil. By B. N. Singh. (With Plate 4 and 3 Text-figures) . . . 52

10. The influence of different bacterial food supplies on the rate of reproduction in *Colpoda steinii*, and the factors influencing encystation. By B. N. Singh . . 65

11. Note. Seasonal occurrence of the take-all disease of wheat. By W. Buddin and S. D. Garrett 74

12. Reviews 75

No. 2 (May 1941)

1. An investigation of the effect of zinc sulphate on plants. By Gwenda N. Davies, M.Sc. (With 2 Text-figures) 81

2. Investigations on the invasion of mushroom beds by *Pseudobalsamia microspora*. By H. H. Glasscock and W. M. Ware. (With 1 Text-figure) 85

3. A wilt disease of godetias and other ornamental plants. By R. Eric Taylor, Ph.D. (With Plate 5) 91

4. The identification of the bacteria commonly causing soft rot in plants. By W. J. Dowson 102

5. Some properties of tobacco etch viruses. By F. C. Bawden and B. Kassanis. (With Plate 6) 107

6. The over-wintering of *Myzus persicae* Sulz. on brassicae in North Wales. By F. H. Jacob, M.Sc. 119

PAGE

7. A study of the frequency with which honeybees visit red clover (*Trifolium pratense*), together with an examination of the environmental conditions. By C. G. Butler, M.A., Ph.D. (With 4 Text-figures) 125

8. The spread of eelworm in commercial narcissus plantings. By A. Beaumont and L. N. Staniland. (With Plate 7 and 1 Text-figure) 135

9. A laboratory spraying apparatus and technique for investigating the action of contact insecticides. With some notes on suitable test insects. By C. Potter, Ph.D., D.I.C. (With Plate 8 and 5 Text-figures) 142

10. Proceedings of the Association of Applied Biologists. The function of applied biology in war time. By Sir E. John Russell, F.R.S. Contributions to the discussion by J. W. Munro, J. C. F. Fryer, G. E. Blackman, F. C. Bawden, R. C. Fisher, H. W. Miles, W. P. K. Findlay, S. D. Garrett, W. A. Millard 170

11. Report of the Council of the Association of Applied Biologists for the year 1940 178

12. Report of the Hon. Treasurer for the year ending 31 December 1940 . . 179

No. 3 (August 1941)

1. The nutrition of the spring cabbage. By R. M. Woodman. (With Plate 9) . 181

2. The influence of lithium salts on certain cultivated plants and their parasitic diseases. By N. L. Kent, Ph.D. (With 3 Text-figures) 189

3. Fungi which cause pre-emergence injury to garden peas. By G. T. S. Baylis, Ph.D. (With Plate 10 and 2 Text-figures) 210

4. A comparative study of strains of *Rhizoctonia solani* (Kuhn) with special reference to their parasitism. By I. F. Storey. (With Plate 11 and 4 Text-figures) . 219

5. Studies in the physiology of the virus diseases of the potato. IV. A comparison of the nitrogen relations of healthy and crinkle potatoes; together with some observations on the nitrogen relations of a "carrier" variety. By E. Barton-Wright. (With 7 Text-figures) 229

6. Transmission of tobacco etch viruses by aphides. By B. Kassanis, Ph.D. . 238

7. Studies of the biology of the death-watch beetle, *Xestobium rufovillosum* de G. IV. The effect of type and extent of fungal decay in timber upon the rate of development of the insect. By Ronald C. Fisher. (With 2 Text-figures) . . 244

8. Sheep blow-fly investigations. IX. On some physical aspects of sheep dipping. By the late R. P. Hobson, B.Sc., Ph.D. (With 6 Text-figures) 261

9. Sheep blow-fly investigations. X. On the possibilities of calomel for the control of sheep maggots. By the late R. P. Hobson, B.Sc., Ph.D. (With 1 Text-figure) 273

10. Wireworm populations and their effect on crops. By D. J. Finney, M.A. (With 1 Text-figure) 282

11. Proceedings of the Association of Applied Biologists. I. Recent work on the sheep tick, and its bearing on control measures. By J. MacLeod, D.Sc. II. Recent work on the sheep maggot problem. By the late R. P. Hobson, B.Sc., Ph.D. III. Some practical aspects of the sheep blow-fly problem. By I. Thomas, Ph.D. . 296

12. Reviews 300

No. 4 (November 1941)

PAGE

1. Damage to greenhouse plants caused by town fogs with special reference to sulphur dioxide and light. By C. R. Metcalfe. (With Plate 12 and 4 Text-figures) 301

2. Varietal susceptibility of peas to marsh spot. By H. H. Glasscock . . 316

3. Soil conditions and the take-all disease of wheat. VII. Survival of *Ophiobolus graminis* on the roots of different grasses. By S. D. Garrett 325

4. The colonization of buried wheat straw by soil fungi, with special reference to *Fusarium culmorum*. By Alan G. Walker, Ph.D. (With 11 Text-figures) . . 333

5. Experiments on the control of club root of brassicae in gardens and allotments. By N. C. Preston 351

6. Variations in the cytoplasmic inclusions induced by three strains of tobacco mosaic virus. By B. Kassanis, Ph.D. and F. M. L. Sheffield, D.Sc. (With Plates 13 and 14) 360

7. Physiological relationships between insects and their host plants. II. A preliminary study of the effects of aphides on the chemical composition of cabbage and field beans. By A. C. Evans. (With 2 Text-figures) 368

8. Host specialization of *Anguillulina pratensis* (De Man). I. Attractiveness of roots. By C. H. Gadd and C. A. Loos 372

9. Host specialization of *Anguillulina pratensis* (De Man). II. Behaviour of the parasite within roots. By C. H. Gadd and C. A. Loos 382

10. Studies on the mechanism of fungicidal action. I. Preliminary investigation of nickel, copper, zinc, silver and mercury. By A. F. Parker Rhodes, B.A. . . 389

11. Reviews 406

12. List of Members of the Association of Applied Biologists 409

INDEX OF AUTHORS

PAGE

BARNES, H. F. Sampling for leatherjackets with orthodichlorobenzene emulsion. (With 2 Text-figures) 23

BARTON-WRIGHT, E. Studies in the physiology of the virus diseases of the potato. IV. A comparison of the nitrogen relations of healthy and crinkle potatoes; together with some observations on the nitrogen relations of a 'carrier' variety. (With 7 Text-figures) 229

BAWDEN, F. C. The function of applied biology in war time. Contribution to the discussion . . 176

—— and KASSANIS, B. Some properties of tobacco etch viruses. (With Plate 6) 107

BAYLIS, G. T. S. Fungi which cause pre-emergence injury to garden peas. (With Plate 10 and 2 Text-figures) 210

BEAUMONT, A. and STANILAND, L. N. The spread of eelworm in commercial narcissus plantings. (With Plate 7 and 1 Text-figure) 135

BLACKMAN, G. E. The function of applied biology in war time. Contribution to the discussion . . 175

BUDDIN, W. and GARRETT, S. D. Note. Seasonal occurrence of the take-all disease of wheat . . 74

BUTLER, C. G. A study of the frequency with which honeybees visit red clover (*Trifolium pratense*), together with an examination of the environmental conditions. (With 4 Text-figures) . . . 125

DAVIES, GWENDA N. An investigation of the effect of zinc sulphate on plants. (With 2 Text-figures) 81

DOWSON, W. J. The identification of the bacteria commonly causing soft rot in plants . . . 102

EDWARDS, E. E. The fever fly (*Dilophus febrilis* L.) and methods for control of its larvae in cultivated lawns 34

EVANS, A. C. Physiological relationships between insects and their host plants. II. A preliminary study of the effects of aphides on the chemical composition of cabbage and field beans. (With 2 Text-figures) 368

FINDLAY, W. P. K. Effect of addition of sugar on rate of decay of wood 19

—— The function of applied biology in war time. Contribution to the discussion 177

FINNEY, D. J. Wireworm populations and their effect on crops. (With 1 Text-figure) . . . 282

FISHER, R. C. The function of applied biology in war time. Contribution to the discussion . . 176

—— Studies of the biology of the death-watch beetle, *Xestobium rufovillosum* de G. IV. The effect of type and extent of fungal decay in timber upon the rate of development of the insect. (With 2 Text-figures) 244

FRYER, J. C. F. The function of applied biology in war time. Contribution to the discussion . . 175

GADD, C. H. and LOOS, C. A. Observations on the life history of *Anguillulina pratensis*. (With 4 Text-figures) 39

—— —— Host specialization of *Anguillulina pratensis* (De Man). I. Attractiveness of roots . . 372

—— —— Host specialization of *Anguillulina pratensis* (De Man). II. Behaviour of the parasite within roots 382

GARRETT, S. D. Soil conditions and the take-all disease of wheat. VI. The effect of plant nutrition upon disease resistance 14

—— Soil conditions and the take-all disease of wheat. VII. Survival of *Ophiobolus graminis* on the roots of different grasses 325

—— The function of applied biology in war time. Contribution to the discussion 177
